

Use-Case Flow Specification

Telemedicine Slot Booking & Prescription Portal

Name: Paras Agarwal

SRN: PES1UG24CS316

Use Case:

Book Video Consultation Slot

Primary Actor:

Patient

Preconditions:

- The patient is authenticated and logged into the portal.
- The patient has selected a physician and specialty and viewed available slots (Use Case: View Doctor Specialties & Availability).
- The slot chosen was marked available as of the page load.

Postconditions:

- A confirmed booking record exists in the system, linked to the patient and physician.
- An encrypted, single-use video consultation room link has been generated and delivered to both the patient and the physician.

Main Success Scenario:

1. Patient selects an available slot for the chosen physician and clicks “Book.”
2. System re-checks the slot's availability in real time.
3. System confirms the slot is still free and reserves it for the patient.
4. System creates the booking record and invokes the included use case «include» Generate Encrypted Room Link.
5. System delivers the room link to the patient and physician via the Notification Service.
6. System displays a booking confirmation showing the date, time, and link status.
7. Use case ends successfully.

Alternate Flow — A1: Slot No Longer Available

Trigger: occurs at step 3, when the slot was booked by another patient between the patient's page load and their booking submission.

- A1.1. System detects that the selected slot is no longer available.
- A1.2. System displays a “Slot unavailable” message to the patient.
- A1.3. System refreshes and displays the current list of open slots for that physician.
- A1.4. Patient selects a different slot, and the flow resumes from step 2 of the Main Success Scenario, or the patient exits the flow.
